The most comprehensive Anniversary Clock / 400-Day Repair Book. 2020 edition. Hundreds of photos and diagrams. * Do you own a clock that is special to you that has stopped working, perhaps a gift or a family heirloom? This book is for you. * Do you like to tinker with mechanical things? This book is for you. * Have you taken a clock apart but can't get it back together? This book is for you. * Are you fascinated with clocks, have several you have bought but do not work? This book is for you. Be bold. Take on your project. This book will hold your hand every step of the way and guide you to success. YOU CAN DO IT. Why does an Anniversary Clock stop Working? Most likely it is because the suspension spring is broken. I will teach you how to replace it. Often, the works are dirty, need oiling or most likely both. When the clock stops, think of it

as \"the oil light is on\". It's a \"cry for help\". Without oil, the metal parts grind on each other causing serious wear and damage. Oil also attracts dust which can make the oil \"gummy\" and add drag to its operation until it can no longer overcome the friction. If a clock is oiled regularly [every three to five years], chances are you will only ever need to re-oil your clock. If the clock is allowed to run until it stops, the only sure way to service it is to remove the works from its case, dismantle the parts, clean, service, and put the movement back together with fresh oil and correct adjustment. This book will teach you how to do all this.

This illuminating book explores the nature of international humanitarian law (IHL), so doing by asking whether it should be seen as a permissive or a restrictive regime. An experienced lawyer in the field, Anne Quintin offers an in-depth expert analysis of this highly debated topic, revealing the true nature of IHL and concluding that whilst IHL initially developed as a restrictive regime composed of prohibitions and prescriptions, it nevertheless contains within it rare permissions that allow states to act.

How military commanders interpret the rules of targeting impacts not only on whether civilians and civilian objects are harmed in the course of a military operation, but also on the scale of harm that ensues. Commentators have queried whether military commanders observed the law even when parties to a conflict acted in accordance with mandates to protect civilians, as was the case when a coalition of states bombed targets in Libya in 2011. However, limited guidance is publicly available on how military commanders apply these rules on the battlefield. In order to allow military commanders to exercise judgment in determining what steps they are required to take to spare civilians in a specific set of circumstances, the rules of targeting are formulated in an open-ended fashion, which complicates one's ability to evaluate whether a particular military operation complies with the law. By examining case studies ranging from Operation Desert Storm in 1991 to Operation Protective Edge in 2014, this book addresses lacunae in current scholarship. It puts forward principles which capture how military commanders deliberate while interpreting what the rules of targeting require in particular scenarios. International humanitarian law, this book contends, places a duty on attackers to assume risk in order to mitigate danger to civilians. Drawing on the field of psychology, this study provides an explanation of how military commanders assess when circumstances do not permit them to inform civilians about a forthcoming attack.
