"In this book, the Enlightenment derives its special appeal as the historical staging ground for an intellectual ferment across Europe and America. Dorinda Outram places ideas in their widest possible context, expounding upon their social, political, and cultural implications and how they condition society's conduct in a variety of ways. She looks at what "Enlightenment" meant to contemporaries, how it affected day-to-day life - for instance, by the spread of reading, the open discussion of religion and the relationship between the sexes, self-knowledge and introspection, scientific research, and advances in medicine."--BOOK JACKET.

The merger is broadly understood as a fusion of two or more units into one. The merger in higher education has received much attention by policy-makers as well as individual institutions in many countries as a means to bring higher education reforms. The merger of higher education institutions is a visible phenomenon in the recent past, but each merger provides a distinctive instance of major strategic change. Besides this, each merger also shows a distinct set of circumstances, actors, and characteristics. The aims of the mergers have been varied across the nations that include a reduction in fragmentation of institutions, economies of scale, enhanced efficiency, enhanced quality etc. Along with disapproval, a great amount of literature surrounding the benefits of the merger has emerged over the period of time. In spite of ample literature on mergers of higher education institutions, there does not appear to be a clear set of financial, efficiency or quality parameters to assess the success. The majority of the discussions have been narratives. In the available literature, the mergers have been classified based on their participants, stakeholders, nature, the strategy that drives them, their motivation, and/or the resultant degree of absorption. This book discusses the merger experiences and case study of different countries in terms of policies and practices. Each country chapter in the above context narrates that in planning the mergers, what have been the philosophical, economic, political, legal and cultural implications? How the factors such as institutional history, geographical distance, provincial tradition, state regulations, the presence of collective bargaining, and pertinent financial matters shaped the process as well as the outcome of the mergers? The idea of merger and its implementation (including process) at both government and institutional level have been discussed. The outcome assessment also forms the part of the discussion.

This second edition of Peru's Indian Peoples and the Challenge of Spanish Conquest includes Stern's 1992 reflections on the ten years of historical interpretation that have passed since the book's original publication-- setting his analysis of Huamanga in a larger perspective. \"This book is a monument to both scholarship and comprehension, comparable in its treatment of the indigenous peoples after the conquest only to that of Charles Gibson for the Aztecs, and perhaps the best volume read by this reviewer in several years.\"-- Frederick P. Bowser, American Historical Review \"Peru's Indian Peoples and the Challenge of Spanish Conquest is clearly indispensable reading for Andeanists and highly recommended to ethnohistorians generally. In technical respects it is a job done right, and conceptually it stands out as a handsome example of anthropology and history woven into one tight fabric of inquiry.\"--Frank Salomon, Ethnohistory
