## Transforming the Workforce for Children Birth Through Age 8

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have

secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

## **Violence and Mental Disorders**

This book explores the issue of violence in detail, taking into account the role of contextual factors, as well as the epidemiology, risk factors and clinical aspects of violence related to the main mental disorders. It also offers practical information on its management – from prevention to treatment. Covering all aspects of the problem of violence in mental disorders, the book is divided into four parts: general aspects; risk factors, phenomenology and characteristics of violence in mental disorders; contexts of violence; and prevention and management of violence in mental health. It also discusses violence in the various settings of mental health system, an aspect that has not previously been fully addressed. The volume is intended for all those who are interested in mental health, including scholars, professionals, and students.

## **The Art of Being Human**

Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

"Aesthetic Politics in Fashion outlines critical studies in the present cross-sections of fashion, art, politics, and global capitalism. Critically examining contemporary collaborations of artists, media, and fashion labels, this groundbreaking anthology locates fashion within ecological and ethical discourses, postcolonial styles, and critical reflections on whiteness. Contributions from a distinguished group of international scholars debate fashion as a cultural phenomenon at the intersection of artistic, creative, economic, and everyday practices. Aesthetic economies, the production of space, and alternative aesthetic politics are explored from interdisciplinary angles: art history, cultural science, sociology, design, and fashion studies. Aesthetic Politics in Fashion advances theorizing of fashion as an aesthetic metapolitics."--Publisher's website.

Technics and Civilization first presented its compelling history of the machine and critical study of its effects on civilization in 1934—before television, the personal computer, and the Internet even appeared on our periphery. Drawing upon art, science, philosophy, and the history of culture, Lewis Mumford explained the origin of the machine age and traced its social results, asserting that the development of modern technology had its roots in the Middle Ages rather than the Industrial Revolution. Mumford sagely argued that it was the moral, economic, and political choices we made, not the machines that we used, that determined our then industrially driven economy. Equal parts powerful history and polemic criticism, Technics and Civilization was the first comprehensive attempt in English to portray the development of the machine age over the last thousand years—and to predict the pull the technological still holds over us today. “The questions posed in the first paragraph of Technics and Civilization still deserve our attention, nearly three quarters of a century after they were written.”—Journal of Technology and Culture

James Leininger was just two years old when he began having disturbing nightmares that would not stop. He screamed out in the night: 'Plane on fire! Little man can't get out!' While nightmares are common among children, what happened next shocked those around him... James began to reveal details of planes and war tragedies that no two-year-old boy could know. His desperate parents were at a loss to help him until he said three things: 'Corsair', 'Natoma' and 'Jack Larsen'. From these tantalising clues, James's parents travelled thousands of miles and spent many long years piecing together these facts to try and find an answer that could end his torment. Finally, despite his mother's fears and his father's staunch Christian beliefs, they found only one possibility to the endless coincidences that surrounded every detail in James's life – that their son was reliving the past life of a World War II fighter pilot. Their touching story is one that will challenge sceptics and confirm the beliefs of those who already believe in life after death.

In this bold interdisciplinary work, Geoffrey Galt Harpham argues that asceticism has played a major role in shaping Western ideas of the body, writing, ethics, and aesthetics. He suggests that we consider the ascetic as \"the 'cultural' element in culture,\" and presents a close analysis of works by Athanasius, Augustine, Matthias, Grünewald, Nietzsche, Foucault, and other thinkers as proof of the extent of asceticism's resources. Harpham demonstrates the usefulness of his findings by deriving from asceticism a \"discourse of resistance,\" a code of interpretation ultimately more generous and humane than those currently available to us.

The National Bestseller “Focused and persuasive... Bray’s book is many things: the first English-language

transnational history of antifa, a how-to for would-be activists, and a record of advice from anti-Fascist organizers past and present.”—THE NEW YORKER “Insurgent activist movements need spokesmen, intellectuals and apologists, and for the moment Mark Bray is filling in as all three... The book’s most enlightening contribution is on the history of anti-fascist efforts over the past century, but its most relevant for today is its justification for stifling speech and clobbering white supremacists.”—Carlos Lozada, THE WASHINGTON POST “[Bray’s] analysis is methodical, and clearly informed by both his historical training and 15 years of organizing, which included Occupy Wall Street... Antifa: The Anti-Fascist Handbook couldn’t have emerged at a more opportune time. Bray’s arguments are incisive and cohesive, and his consistent refusal to back down from principle makes the book a crucial intervention in our political moment.”—SAN FRANCISCO CHRONICLE In the wake of tragic events in Charlottesville, VA, and Donald Trump's initial refusal to denounce the white nationalists behind it all, the “antifa” opposition movement is suddenly appearing everywhere. But what is it, precisely? And where did it come from? As long as there has been fascism, there has been anti-fascism — also known as “antifa.” Born out of resistance to Mussolini and Hitler in Europe during the 1920s and ’30s, the antifa movement has suddenly burst into the headlines amidst opposition to the Trump administration and the alt-right. They could be seen in news reports, often clad all in black with balaclavas covering their faces, demonstrating at the presidential inauguration, and on California college campuses protesting far-right speakers, and most recently, on the streets of Charlottesville, VA, protecting, among others, a group of ministers including Cornel West from neo-Nazi violence. (West would later tell reporters, “The anti-fascists saved our lives.”) Simply, antifa aims to deny fascists the opportunity to promote their oppressive politics, and to protect tolerant communities from acts of violence promulgated by fascists. Critics say shutting down political adversaries is anti-democratic; antifa adherents argue that the horrors of fascism must never be allowed the slightest chance to triumph again. In a smart and gripping investigation, historian and former Occupy Wall Street organizer Mark Bray provides a detailed survey of the full history of anti-fascism from its origins to the present day — the first transnational history of postwar anti-fascism in English. Based on interviews with anti-fascists from around the world, Antifa details the tactics of the movement and the philosophy behind it, offering insight into the growing but little-understood resistance fighting back against fascism in all its guises.

'Louis Wain invented a cat style, a cat society, a whole cat world'. Broadcast in 1925 by H.G. Wells, these words characteristically foretold the future of the Wain cat which has, once more, become the century's most recognisable image in cat art. During their heyday, in the time before the First World War, Louis Wain's cats, dressed as humans, portrayed that stylish Edwardian world having fun: at restaurants and tea parties, going to the Race and the Seaside, celebrating at Christmas and Birthdays, and disporting themselves with exuberant games of tennis, bowls, cricket and football. This is a titillating world of cats at play, uninhibited and slightly dangerous, with most group activities likely to turn into mishap, mayhem and catastrophe. This is Wain's world, funny, edgy and animated: a whole cat world. The first comprehensive exhibition of Wain's work was held at the Victoria and Albert Museum in London in 1972 and, since then, Louis Wain has steadily become more fashionable, and collected worldwide. This biography contains 300 plates of richness and variety, all of which are reproduced faithfully from the original artwork. This book is jointly published by Chris Beetles Ltd and Canongate Books.

Imaginations of female rule and the imaginative strategies of women rulers What is the gender of political power ? What happens to the history of sovereignty when we reconsider it from a gender perspective ? Political sovereignty has been a major theme in European thought from the very beginning of intellectual reflection on community. Philosophy and political theory, historiography, theology, and literature and the arts have, often in dialogue with one another, sought to represent or recalibrate notions of rule. Yet whatever covenant was imagined, sovereign rule has consistently been figured as a male prerogative While in-depth studies of historical women rulers have proliferated in the past decades, these have not systematically

explored how all women rulers throughout the entirety of European culture have had to operate in a context that could not think power as female – except in grotesque terms. *Strategic Imaginations* demonstrates that this constitutive tension can only be brought out by studying women’s political rule in a comparative and *longue durée* manner. The book offers a collection of essays that brings together studies of female sovereignty from the Polish-Lithuanian to the British Commonwealth, and from the Middle Ages to the genesis of modern democracy. It addresses historical figures and takes stock of the rich yet unsettling imagination of female rule in philosophy, literature and art history. For all the variety of geographical, social, and historical contexts it engages, the book reveals surprising resonances between the strategies women rulers used and the images and practices they adopted in the context of an all-pervasive skepticism toward female rule.

“Rachel Macy Stafford's post \"The Day I Stopped Saying Hurry Up\" was a true phenomenon on The Huffington Post, igniting countless conversations online and off about freeing ourselves from the vicious cycle of keeping up with our overstuffed agendas. Hands Free Mama has the power to keep that conversation going and remind us that we must not let our lives pass us by.” --Arianna Huffington, Chair, President, and Editor-in-Chief of the Huffington Post Media Group, nationally syndicated columnist, and author of thirteen books <http://www.huffingtonpost.com/> DISCOVER THE POWER, JOY, AND LOVE of Living “Hands Free” If technology is the new addiction, then multi-tasking is the new marching order. We check our email while cooking dinner, send a text while bathing the kids, and spend more time looking into electronic screens than into the eyes of our loved ones. With our never-ending to-do lists and jam-packed schedules, it’s no wonder we’re distracted. But this isn’t the way it has to be. In July 2010, special education teacher and mother Rachel Macy Stafford decided enough was enough. Tired of losing track of what matters most in life, Rachel began practicing simple strategies that enabled her to momentarily let go of largely meaningless distractions and engage in meaningful soul-to-soul connections. She started a blog to chronicle her endeavors and soon saw how both external and internal distractions had been sabotaging her happiness and preventing her from bonding with the people she loves most. Hands Free Mama is the digital society’s answer to finding balance in a media-saturated, perfection-obsessed world. It doesn’t mean giving up all technology forever. It doesn’t mean forgoing our jobs and responsibilities. What it does mean is seizing the little moments that life offers us to engage in real and meaningful interaction. It means looking our loved ones in the eye and giving them the gift of our undivided attention, leaving the laundry till later to dance with our kids in the rain, and living a present, authentic, and intentional life despite a world full of distractions. So join Rachel and go hands-free. Discover what happens when you choose to open your heart—and your hands—to the possibilities of each God-given moment.

The classic work on the music of Afrofuturism, from jazz to jungle *More Brilliant than the Sun: Adventures in Sonic Fiction* is one of the most extraordinary books on music ever written. Part manifesto for a militant posthumanism, part journey through the unacknowledged traditions of diasporic science fiction, this book finds the future shock in Afrofuturist sounds from jazz, dub and techno to funk, hip hop and jungle. By exploring the music of such musical luminaries as Sun Ra, Alice Coltrane, Lee Perry, Dr Octagon, Parliament and Underground Resistance, theorist and artist Kodwo Eshun mobilises their concepts in order to open the possibilities of sonic fiction: the hitherto unexplored intersections between science fiction and organised sound. Situated between electronic music history, media theory, science fiction and Afrodiasporic studies, *More Brilliant than the Sun* is one of the key works to stake a claim for the generative possibilities of Afrofuturism. Much referenced since its original publication in 1998, but long unavailable, this new edition includes an introduction by Kodwo Eshun as well as texts by filmmaker John Akomfrah and producer Steve Goodman aka kode9.

## Strategic Imaginations

When Christian singer and speaker Staci Frenes learned her teenage daughter was gay, she found her dreams for the future--along with her lifelong faith--collapsing around her. Coming to terms with a new reality was a challenge--and an invitation--to make room for many things along the way: the inevitability of uncertainty, hope in the midst of loss, awkward and tough conversations, an expanding faith, and a greater understanding of how people are more the same than different. In *Love Makes Room*, Frenes helps readers see that a reimagined future may look different than our old hoped-for pictures of ourselves and our families, but it can also be wider, deeper, and more fulfilling than we ever dreamed.

The function of the painted wooden object ranges from the practical to the profound. These objects may perform utilitarian tasks, convey artistic whimsy, connote noble aspirations, and embody the highest spiritual expressions. This volume, illustrated in color throughout, presents the proceedings of a conference organized by the Wooden Artifacts Group of the American Institute for Conservation of Historic and Artistic Works (AIC) and held in November 1994 at the Colonial Williamsburg Foundation in Williamsburg, Virginia. The book includes 40 articles that explore the history and conservation of a wide range of painted wooden objects, from polychrome sculpture and altarpieces to carousel horses, tobacconist figures, Native American totems, Victorian garden furniture, French cabinets, architectural elements, and horse-drawn carriages. Contributors include Ian C. Bristow, an architect and historic-building consultant in London; Myriam Serck-Dewaide, head of the Sculpture Workshop, Institut Royal du Patrimoine Artistique, Brussels; and Frances Gruber Safford, associate curator of American decorative arts at the Metropolitan Museum of Art in New York. A broad range of professionals—including art historians, curators, scientists, and conservators—will be interested in this volume and in the multidisciplinary nature of its articles.

## More Brilliant than the Sun

"Much of this book is about loneliness. Yet its pages are bracingly companionable. It is one of the friendliest books ever written. It is a superb piece of autobiography, testimony that cannot be impeached. While it is a statement of an American tragedy, it has laughter, brevity, style; as a book to pass the time away with, it is in a class with the best fiction." — Carl Sandburg, *New York World* "Nothing half as rewarding has come down the highway of books about thieves, tramps, murderers, bootleggers and crooks in years" — *New Republic* "I believe Jack Black has written a remarkable book; it is vivid and picturesque; it is not fiction; it is a book that was needed and it should be widely read." — Clarence Darrow, *New York Herald Tribune* A major influence on William S. Burroughs and other Beat writers, this lost classic was written by Jack Black, a drifter and small-time criminal. Born in 1872, Black hit the road at the age of 16 and spent most of his life as a vagabond. In this plainspoken but colorful memoir, he recaptures a hobo underworld of the early twentieth century, a time when it was possible to pass anonymously from town to town. Black's firsthand accounts of hopping trains, burglaries, prison, and drug addiction offer a compelling portrait of life outside the law and honor among thieves.

... the Handbook of Qualitative Research Methods in Entrepreneurship is an important contribution to the field, and should be referenced in any paper using qualitative methodologies to investigate the entrepreneurial phenomenon. Craig S. Galbraith, *Journal of Enterprising Communities* There is no hiding behind the ramparts of dry scholarship here. The credibility of the theory being spoken of is not the stuff of constructed proofs, but alignments of critical insight and utility. This is where qualitative work can make a difference to the field, and where this book makes its mark. Robin Holt, *International Journal of Entrepreneurial Behaviour and Research* The Handbook of Qualitative Research Methods in Entrepreneurship is an unusually solid and multifaceted book on what qualitative methods have done, are

doing and will do in entrepreneurship research. Every serious entrepreneurship scholar should read it. It points at the future! Björn Bjerke, University of Kalmar, Sweden I would warmly recommend this unique collection of qualitative methods of entrepreneurship research to both mature and beginning researchers as a menu to choose from for their planned empirical studies. For those who try to get away from only quantitative studies in both business practice and academic research, this book is their chance to find a rich inspiration in reflecting on entrepreneurship as a lived experience using grounded theory and ethnographic, discourse and narrative approaches. It might convince editors of top journals of entrepreneurship research to welcome qualitative research submissions as an indispensable complement to quantitative only submissions. This domain is not physics. In bringing together such a variety of experts from so many nationalities in this Handbook, our Danish colleagues are making entrepreneurship research a realistic global venture. Jan Ulijn, Eindhoven University of Technology, The Netherlands Helle Neergaard and John Parm Ulhøi have compiled a remarkable collection of work that both represents the range of methods and demonstrates the depth of insight that can be achieved through qualitative approaches. This book is not simply a handbook of qualitative research methods, though it well achieves this aim, it is also an important contribution towards the field of entrepreneurship research. From the Foreword by Sara Carter This expansive and practical Handbook introduces the methods currently used to increase the understanding of the usefulness and versatility of a systematic approach to qualitative research in entrepreneurship. It fills a crucial gap in the literature on entrepreneurship theory, and, just as importantly, illustrates how these principles and techniques can be appropriately and fruitfully employed. The Handbook is underpinned by the belief that qualitative research has the potential to charter hitherto unexplored waters in the field of entrepreneurship and thus contribute significantly to its further advancement. The contributors seek to assist entrepreneurship researchers in making more informed choices and designing more rigorous and sophisticated studies. They achieve this by providing concrete examples of research experiences and tangible how to advice. By clarifying what these research methods entail, how they are currently being used and how they can be evaluated, this Handbook constitutes a comprehensive and highly accessible methodological toolbox. Dealing with both well-accepted qualitative approaches and lesser-known, rarer and more novel approaches to the study of entrepreneurship, this Handbook will be invaluable to those studying, researching and teaching entrepreneurship.

Here's what three pioneers in computer graphics and human-computer interaction have to say about this book: "What a tour de force—everything one would want—comprehensive, encyclopedic, and authoritative." — Jim Foley "At last, a book on this important, emerging area. It will be an indispensable reference for the practitioner, researcher, and student interested in 3D user interfaces." — Andy van Dam "Finally, the book we need to bridge the dream of 3D graphics with the user-centered reality of interface design. A thoughtful and practical guide for researchers and product developers. Thorough review, great examples." — Ben Shneiderman As 3D technology becomes available for a wide range of applications, its successful deployment will require well-designed user interfaces (UIs). Specifically, software and hardware developers will need to understand the interaction principles and techniques peculiar to a 3D environment. This understanding, of course, builds on usability experience with 2D UIs. But it also involves new and unique challenges and opportunities. Discussing all relevant aspects of interaction, enhanced by instructive examples and guidelines, 3D User Interfaces comprises a single source for the latest theory and practice of 3D UIs. Many people already have seen 3D UIs in computer-aided design, radiation therapy, surgical simulation, data visualization, and virtual-reality entertainment. The next generation of computer games, mobile devices, and desktop applications also will feature 3D interaction. The authors of this book, each at the forefront of research and development in the young and dynamic field of 3D UIs, show how to produce usable 3D applications that deliver on their enormous promise. Coverage includes: The psychology and human factors of various 3D interaction tasks Different approaches for evaluating 3D UIs Results from empirical studies of 3D interaction techniques Principles for choosing appropriate input and output devices for 3D systems Details and tips on implementing common 3D interaction techniques Guidelines for selecting the most effective interaction techniques for common 3D tasks Case studies of 3D UIs in real-world applications To help you keep pace with this fast-evolving field, the book's Web site, [www.3dui.org](http://www.3dui.org), will offer information

and links to the latest 3D UI research and applications.

Untangling the long history of neoliberalism Neoliberalism is dead. Again. Yet the philosophy of the free market and the strong state has an uncanny capacity to survive, and even thrive, in times of crisis. Understanding neoliberalism's longevity and its latest permutation requires a more detailed understanding of its origins and development. This volume breaks with the caricature of neoliberalism as a simple, unvariegated belief in market fundamentalism and homo economicus. It shows how neoliberal thinkers perceived institutions from the family to the university, disagreed over issues from intellectual property rights and human behavior to social complexity and monetary order, and sought to win consent for their project through the creation of new honors, disciples, and networks. Far from a monolith, neoliberal thought is fractured and, occasionally, even at war with itself. We can begin to make sense of neoliberalism's nine lives only by understanding its own tangled and complex history.

Providing a distillation of knowledge in the various disciplines of arts education (dance, drama, music, literature and poetry and visual arts), this essential handbook synthesizes existing research literature, reflects on the past, and contributes to shaping the future of the respective and integrated disciplines of arts education. While research can at times seem distant from practice, the Handbook aims to maintain connection with the live practice of art and of education, capturing the vibrancy and best thinking in the field of theory and practice. The Handbook is organized into 13 sections, each focusing on a major area or issue in arts education research.

History, Power, Text: Cultural Studies and Indigenous Studies is a collection of essays on Indigenous themes published between 1996 and 2013 in the journal known first as UTS Review and now as Cultural Studies Review. This journal opened up a space for new kinds of politics, new styles of writing and new modes of interdisciplinary engagement. History, Power, Text highlights the significance of just one of the exciting interdisciplinary spaces, or meeting points, the journal enabled. 'Indigenous cultural studies' is our name for the intersection of cultural studies and Indigenous studies showcased here. This volume republishes key works by academics and writers Katelyn Barney, Jennifer Biddle, Tony Birch, Wendy Brady, Gillian Cowlshaw, Robyn Ferrell, Bronwyn Fredericks, Heather Goodall, Tess Lea, Erin Manning, Richard Martin, Aileen Moreton-Robinson, Stephen Muecke, Alison Ravenscroft, Deborah Bird Rose, Lisa Slater, Sonia Smallacombe, Rebe Taylor, Penny van Toorn, Eve Vincent, Irene Watson and Virginia Watson—many of whom have taken this opportunity to write reflections on their work—as well as interviews between Christine Nicholls and painter Kathleen Petyarre, and Anne Brewster and author Kim Scott. The book also features new essays by Birch, Moreton-Robinson and Crystal McKinnon, and a roundtable discussion with former and current journal editors Chris Healy, Stephen Muecke and Katrina Schlunke.

In this first presentation of the artist's complete work, leading contemporary art historian Rosalind Krauss reviews Cindy Sherman's remarkable series of photographic works - in which the artist has notoriously assumed various roles, from B-movie starlet to Old Master model - and the enormous influence these works have had on feminist thinking and on current dialogues about the strategies of contemporary art in general. Almost perversely, Krauss argues, Sherman's unsettling attempts to dissect the formation and perception of images have turned her artworks - and herself - into icons for feminists' and others' agendas. Krauss explores in depth the various approaches to Sherman's work taken by philosophers and art historians and asks if they have not often lost sight of the imagery itself - or, more specifically, the way the images are constructed. In a

further essay, Norman Bryson, internationally known for his pioneering theories on the semiotics of looking, explores Sherman's most recent, horror-show images of mannequins (known as the Sex Pictures) and identifies their place in her continued out-of-body investigations. Along with a bibliography and chronology, more than 200 illustrations (140 in color), including numerous unpublished works, represent Sherman's complete career to date.

## **Toxicological Profile for Fluorides, Hydrogen Fluoride, and Fluorine**

This book explores the future of international environmental law in a world of ever worsening environmental crises. It examines the success stories and failures of international environmental law and argues that future responses to global environmental crises will be more about good environmental governance than just more treaties and laws. Environmental governance will need to accommodate the needs and aspirations of peoples from developed and developing countries alike and will have to be based on decisions and actions by a vast range of actors and stakeholders--not just the nation-state that has traditionally dominated environmental diplomacy. This also suggests a need to be cognizant of the close links to other areas of international law, including human rights. "The Future of International Environmental Law" tackles the major environmental challenges of our times including climate change, biodiversity loss, and pollution and overfishing of the oceans. It examines what we can learn from the implementation of existing international environmental laws over the past few decades. It also considers a range of emerging issues such as the management of the environmental challenges faced by the Arctic, nanotechnology, biofuels and synthetic genomics.

With more than 400,000 copies now in print, *The Craft of Research* is the unrivaled resource for researchers at every level, from first-year undergraduates to research reporters at corporations and government offices. Seasoned researchers and educators Gregory G. Colomb and Joseph M. Williams present an updated third edition of their classic handbook, whose first and second editions were written in collaboration with the late Wayne C. Booth. *The Craft of Research* explains how to build an argument that motivates readers to accept a claim; how to anticipate the reservations of readers and to respond to them appropriately; and how to create introductions and conclusions that answer that most demanding question, "So what?" The third edition includes an expanded discussion of the essential early stages of a research task: planning and drafting a paper. The authors have revised and fully updated their section on electronic research, emphasizing the need to distinguish between trustworthy sources (such as those found in libraries) and less reliable sources found with a quick Web search. A chapter on warrants has also been thoroughly reviewed to make this difficult subject easier for researchers. Throughout, the authors have preserved the amiable tone, the reliable voice, and the sense of directness that have made this book indispensable for anyone undertaking a research project.

## The Future of International Environmental Law

This edited collection examines the culture of surveillance as it is expressed in the built environment. Expanding on discussions from previous collections; *Spaces of Surveillance: States and Selves* (2017) and *Surveillance, Race, Culture* (2018), this book seeks to explore instances of surveillance within and around specific architectural entities, both historical and fictitious, buildings with specific social purposes and those existing in fiction, film, photography, performance and art. Providing new readings of, and expanding on Foucault's work on the panopticon, these essays examine the role of surveillance via disparate fields of enquiry, such as the humanities, social sciences, technological studies, design and environmental disciplines. *Surveillance, Architecture and Control* seeks to engender new debates about the nature of the surveilled environment through detailed analyses of architectural structures and spaces; examining how cultural, geographical and built space buttress and produce power relations. The various essays address the ongoing fascination with contemporary notions of surveillance and control.
